

HARNISH DRIVE

Construction Project

Construction Update: August 7, 2021

New storm sewer infrastructure installation

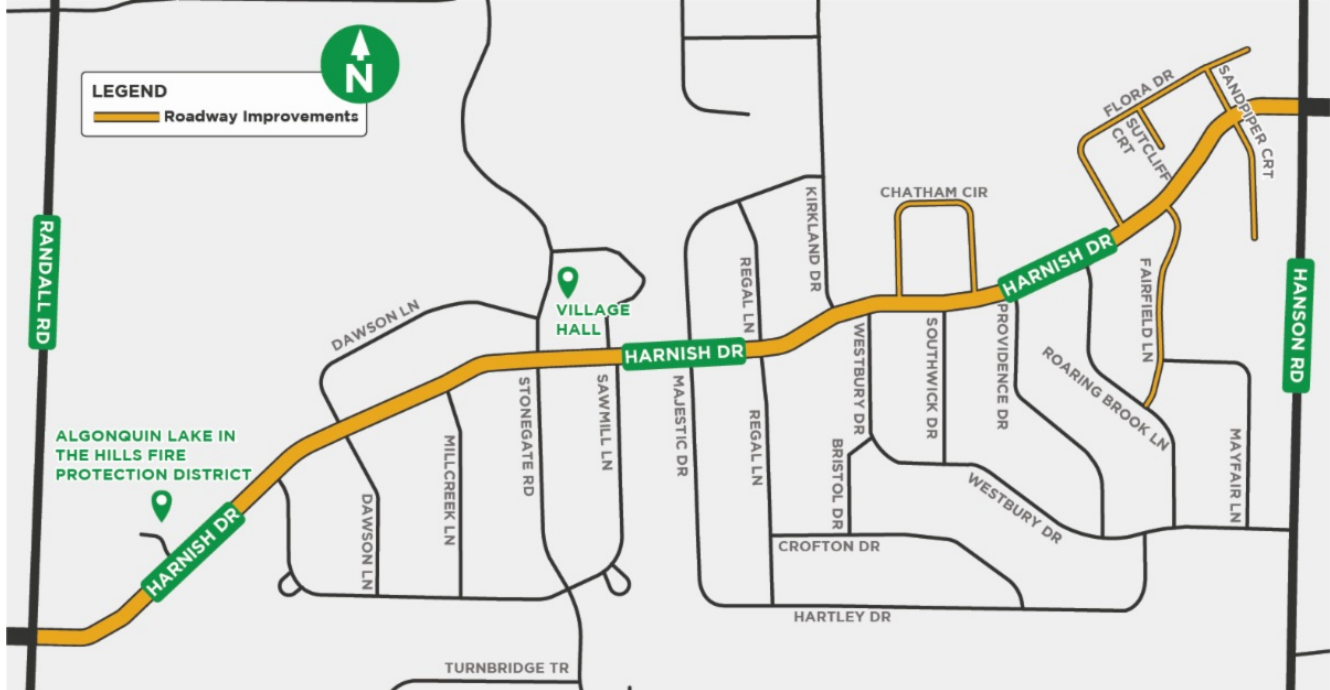

Topsoil placement around new sidewalks

This week, project activities included removing trees, survey layout and saw-cutting pavement that allowed crews to begin installing new storm sewer infrastructure. In addition, manholes and storm inlets were delivered, and crews began landscape restoration work with topsoil around the new sidewalks.

Project Overview

As part of the reconstruction of Harnish Drive from Randall Road to Hanson Road, the Village will repair and resurface roadways, as well as improve drainage, patch driveway and curbs and address ADA improvements such as striping of pedestrian crosswalks. The project includes improvements to Harnish Drive, Chatham Circle, Flora Drive, Sutcliff Court, Sandpiper Court and Fairfield Lane.
