

HARNISH DRIVE

Construction Project

Construction Update: October 23, 2021

Surface asphalt placement on Harnish Drive

Last week, the contractor completed placement of the asphalt surface course - the top layer of the driving surface which provides a smooth driving experience - as well as permanent pavement markings.

In the coming weeks, the contractor will complete the installation of the flashing beacons at the main crosswalk by the park, saw and seal cracks in the curb, and complete any outstanding punchlist items.

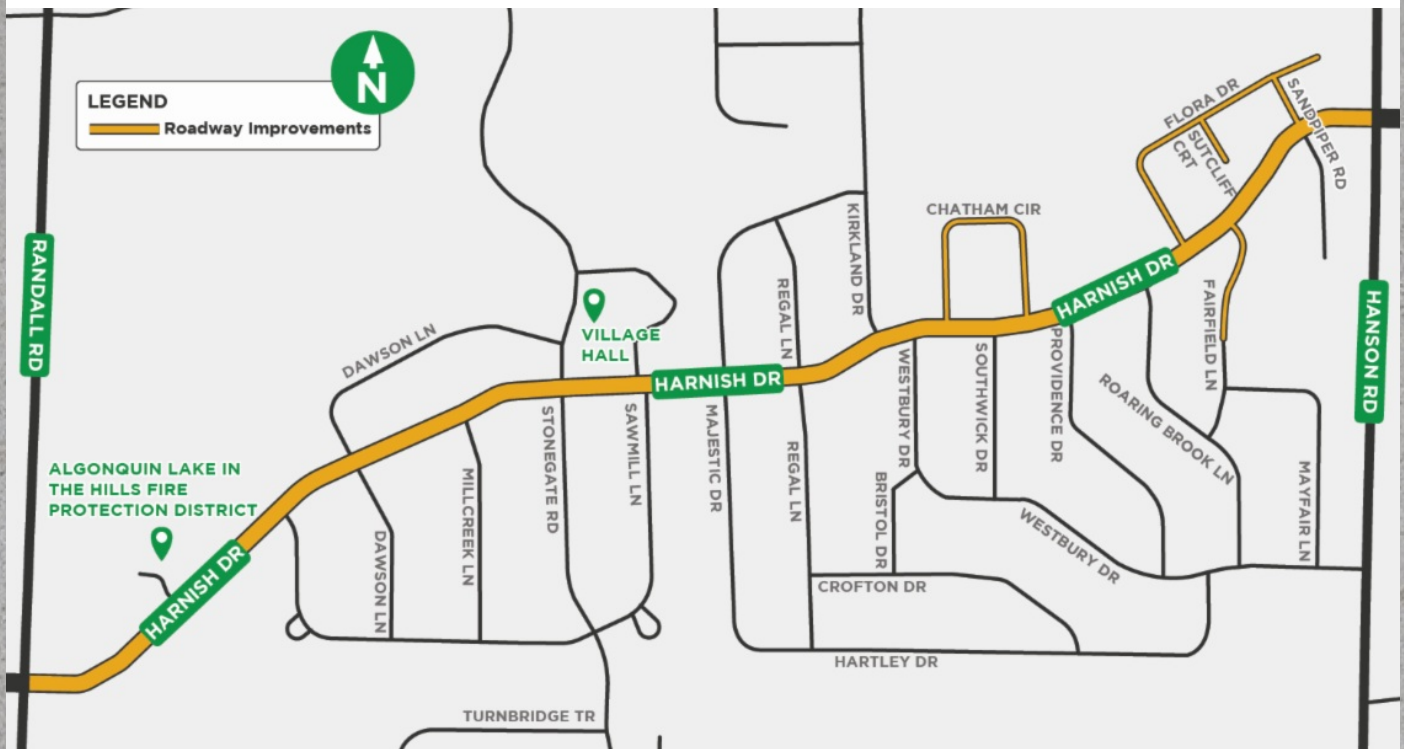

New asphalt surface and permanent pavement markings

Project Overview

As part of the reconstruction of Harnish Drive from Randall Road to Hanson Road, the Village will repair and resurface roadways, as well as improve drainage, patch driveway and curbs and address ADA improvements such as striping of pedestrian crosswalks. The project includes improvements to Harnish Drive, Chatham Circle, Flora Drive, Sutcliff Court, Sandpiper Court and Fairfield Lane.
